About Dover

Dover is a diversified global manufacturer and solutions provider with annual revenue of approximately $8 billion. We deliver innovative equipment and components, consumable supplies, aftermarket parts, software and digital solutions, and support services through five operating segments: Engineered Products, Clean Energy & Fueling, Imaging & Identification, Pumps & Process Solutions and Climate & Sustainability Technologies. Dover combines global scale with operational agility to lead the markets we serve. Recognized for our entrepreneurial approach for over 65 years, our team of over 25,000 employees takes an ownership mindset, collaborating with customers to redefine what’s possible. Headquartered in Downers Grove, Illinois, Dover trades on the New York Stock Exchange under “DOV.” Additional information is available at dovercorporation.com.

Our Five Operating Segments

**Engineered Products**
Delivering industry-leading equipment, components and software serving the vehicle service, environmental solutions and other end markets.

**Clean Energy & Fueling**
Providing a comprehensive portfolio of safety and efficiency solutions for the convenience retail, fueling and clean energy, cryogenic gas and vehicle wash markets.

**Imaging & Identification**
Leading the design and manufacture of equipment, consumables and software, in addition to providing support services for the marking & coding, product traceability and digital textile printing markets.

**Pumps & Process Solutions**
Creating performance-critical solutions and products for the safe handling of fluids across the chemical, hygienic, biopharma, oil & gas and industrial markets.

**Climate & Sustainability Technologies**
Developing and supplying innovative and energy-efficient equipment and systems serving the commercial refrigeration, heating & cooling and beverage packaging equipment markets.
Engineered Products

Delivering industry-leading equipment, components and software serving the vehicle service, environmental solutions and other end markets. Click to Read More

The new Heil PT1100 Rear Loader by Environmental Solutions Group represents a completely new take on what a rear loader should be. Heil designed the PT1100 with operator safety in mind, including hydraulic tailgate locks and the ability to eject its payload while the driver remains safely in the cab. And as with all Heil products, the PT1100 is Connected Collections™ ready, providing fleet owners with information that allows them to make better decisions – faster.
Engineered Products

Operating Companies

DESTACO
Manufacturing work-holding and flexible-automation components, including clamps, grippers, indexers, slides, conveyers, robotic tooling, and remote handling products.

Environmental Solutions Group
Innovating to produce solutions that process, transport and transform the solid waste stream into sustainable resources that benefit customers and communities.

Microwave Products Group
Providing mission-critical radio frequency and microwave filters, switches and subsystems for the defense, aerospace, telecommunications and space markets.

OK International
Delivering market-leading quality and innovation for benchtop soldering and dispensing solutions in electronics and industrial product assembly.

TWG
Engineering a wide range of industry-specific winches, hoists, slewing ring bearings, swing drives, electronic monitoring and object detection systems and more for key industrial markets.

VSG
Developing the best in vehicle lifting, wheel service, ADAS calibration, diagnostic, and collision repair equipment along with the world's highest quality powertrain disconnect products.

The R1065 Mobile Tablet Aligner, from Vehicle Service Group’s Rotary Lift, offers shops of all sizes an easy-to-use solution for performing wheel alignments and provides real-time guidance while removing guesswork for the technician.
Microwave Products Group, comprised of five elite brands: BSC Filters™, Dow-Key Microwave®, Espy™, K&L Microwave®, and Pole/Zero®, is a leading global provider of mission-critical, engineered electronic components and subsystems with six world-class business development and manufacturing locations.

Engineered Products

Widely used within the Automotive industry, DESTACO's Robotic Tooling is incorporated into Robotic cell applications for transferring parts into and from various types of high-speed and hot stamping press lines. DESTACO's Accelerate® End-of-Arm Tooling is lightweight and helps stamping press operators speed up production lines with greater efficiencies.

TwG serves the Infrastructure, Energy, Recovery, Natural Resource, and Marine markets, providing a range of essential parts and products across seven model lines: DP Winch, Gear Products, Greer, Pullmaster, LANTEC, Tulsa Winch, and RUFNEK.

Telemanipulators by Central Research Laboratories (CRL), a DESTACO company, allow operators to perform work remotely in high radiation or hazardous environments. This Model G Telemanipulator is ideal for use in the production of radio isotopes used in critical medical diagnostic and therapeutic procedures.
Clean Energy & Fueling

Providing a comprehensive portfolio of safety and efficiency solutions for the convenience retail, fueling and clean energy, cryogenic gas and vehicle wash markets. Click to Read More

The Dover Fueling Solutions Anthem™ UX user experience platform on the Wayne Ovation® fuel dispenser is an immersive digital experience during the refueling process. Available from Dover Fueling Solutions (DFS) in the North America market, the Anthem UX platform is the first solution to give customers the ability to fine tune their experience, driving customized, targeted promotional strategies right at the dispenser. It’s refueling reinvented, reimagined and reborn.
Clean Energy & Fueling

Operating Companies

Advancing fueling and convenience retail operations worldwide through innovative dispensing technologies, point-of-sale (POS) systems, automatic tank gauging, and wetstock management solutions.

Defining what's next in fluid handling and car wash innovations with technologies that protect people and the environment, while improving business performance for customers worldwide.

In December 2021, OPW acquired both Acme Cryogenics and RegO and established a new business unit – OPW Clean Energy. With its expanded capabilities, OPW serves the clean energy market by providing solutions for alternative fuels, such as LPG, LNG and Hydrogen – fuels that can power our lives while reducing emissions.

OPW's 14 Series nozzles feature innovative patented and patent-pending free-draining spout technology designed to serve up a cleaner and greener fueling experience for customers.

The LIQAL LNG dispenser is a user-friendly, reliable and cost-effective solution that complies with all industry standards, including the Measuring Instruments Directive (MID). Available from DFS in the European market, the LIQAL LNG dispenser is an innovative alternative fuel solution that is currently experiencing robust adoption.
Tokheim, part of Dover Fueling Solutions, is committed to providing fuel retailers with complete fuel dispensing solutions to operate their stations profitably, efficiently and safely.

OPW Vehicle Wash Solutions brings together three of the most trusted names in the car wash industry - Belanger, PDQ, and Innovative Control Systems (ICS). Together, these companies create a revolutionary single source for all vehicle wash needs.
Imaging & Identification

Leading the design and manufacture of equipment, consumables and software, in addition to providing support services for the marking & coding, product traceability and digital textile printing markets. Click to Read More

The MS MiniLario by MS Printing Solutions, in combination with DIGISTAR BELLAGIO BIB reactive inks from JK Group, leads the world of textile printing by using digital technology to offer flexibility and versatility while quickly delivering high-quality prints.
Imaging & Identification

Operating Companies

Markem-Imaje delivers intelligent identification and traceability solutions, services and expertise to empower our customers with the right information across the supply chain. The Markem-Imaje 9450 is designed to be fully available and keep up with increased line speed and secure each product with the right code.

Building connected and safe supply chains through innovative marking and coding solutions seamlessly integrated with product identification and traceability software and services.

Developing effective printing solutions through innovative software, inks and consumables, along with printing systems for the digital textile, soft signage and specialty materials markets.

Markem-Imaje
Pumps & Process Solutions

Creating performance-critical solutions and products for the safe handling of fluids across the chemical, hygienic, biopharma, oil & gas and industrial markets. Click to Read More

The MicroCNX™ Series single-use genderless sterile connectors by CPC (Colder Products Company) are designed to disrupt the traditional use of cumbersome tube welding. CPC products are recognized for innovation and reliability and are preferred connectors in diverse applications from electric vehicle charging stations and 3D printing to ventilators and the production of vaccines.
Polyrex gear pumps by MAAG Group are used in compounding applications. They ensure the necessary pressure build-up after an extruder so that the plastics can be cut into plastic pellets in the pelletizer.
Pumps & Process Solutions

The MAAG Group is equipped with the latest manufacturing technologies. Due to the complex geometries and different sizes, the deburring of our gear pump housings is still made manually by our highly skilled staff.

Cook Compression, part of Dover Precision Components, is the market leader in cylinder valves and sealing systems for reciprocating compressors. Our products increase machine uptime and reduce leakage to lower carbon emissions.

As the leading innovator of pumps, flow meters, compressors and dispensing equipment, PSG solutions are utilized across the globe to transfer critical fluids in a wide range of markets such as the paint & coatings, biopharma, hygienic, chemical, oil & gas, water & wastewater and transportation industries.
Climate & Sustainability Technologies

Developing and supplying innovative and energy-efficient equipment and systems serving the commercial refrigeration, heating & cooling and beverage packaging equipment markets. [Click to Read More]

Advansor, part of Dover’s Climate & Sustainability Technologies segment, designs and produces sustainable CO₂ climate solutions for supermarkets and industrial customers around the world.
Climate & Sustainability Technologies

Operating Companies

Belvac
Developing creative and flexible solutions directly for beverage container manufacturers and brand owners around the world.

DOVER FOOD RETAIL
Manufacturing commercial and industrial refrigeration systems, refrigerated display cases and specialty products along with glass and freezer doors and lighting systems.

SWEP
Designing and manufacturing brazed plate heat exchangers for HVAC, refrigeration and other industrial markets.

**SWEP** is a leader in developing innovative solutions for heat transfer, paving the way to efficient and sustainable energy use. In addition to supporting the worldwide trend toward electrification, SWEP is also enabling the transition to renewable energy sources.
Climate & Sustainability Technologies

Hillphoenix, part of Dover Food Retail, offers full store solutions from retail display cases and merchandisers, to CO2 and alternative refrigeration systems to design center services.

Belvac supplies the global marketplace with the machinery and technology to produce environmentally responsible aluminum cans and bottles. For over fifty years, Belvac machinery has been utilized to manufacture aluminum beverage containers throughout the world.
